Experience

AUMOVIO (formerly Continental Autonomous Mobility)

Lindau, Germany

Software Concept Developer / Innovation Manager for Algorithms

Nov 2022 - Now

- End-to-end leadership of an AI-enabled vision solution, steering the process from initial concept to customer nomination and series-production preparation, culminating in a key technical patent application.
- Establishment of the solution as a strategic product-roadmap priority, driving strong customer engagement and executive/board-level visibility.
- Active full-stack AI development and lifecycle ownership (data pipeline, model training, optimization, deployment, system integration), coupled with strengthened engineering governance via code reviews and documentation.
- Cross-functional project management across 4 global regions, aligning engineering and business stakeholders in Europe, the USA, China, and India.
- Multi-lingual (EN/DE/CN) technical interface, delivering high-impact presentations and live demonstrations to international customers, executives, and trade fair audiences.

abas Software GmbH

Karlsruhe, Germany

Working Student

Jun 2018 - Jan 2020

- Cloud-based Document Management System development using Polymer, Vue.js, TypeScript, JavaScript, and AWS
- Creation of automated tests with Jest and Cypress
- Close collaboration in an internationally distributed scrum team

Education

Karlsruhe Institute of Technology (KIT)

M.Sc. in Computer Science

Artificial Intelligence

Karlsruhe, Germany • Apr 2019 - Sep 2022

- **Relevant Coursework:** Machine Learning, Pattern Recognition, Computer Vision for Human-Computer Interaction, Deep Learning and Neural Networks, Deep Learning for Computer Vision, Natural Language Processing, Nonlinear Optimization
- **Master Thesis:** “Real World Crowd Pose Estimation with Transformers” (Grade:1.0/1.0, German Grading System)

Karlsruhe Institute of Technology (KIT)

B.Sc. in Computer Science

Robotics and Automation, Software Engineering

Karlsruhe, Germany • Oct 2014 - Apr 2019

Publications

Flying Guide Dog: Walkable Path Discovery for the Visually Impaired Utilizing Drones and Transformer-based Semantic Segmentation

2021 IEEE International Conference on Robotics and Biomimetics

Haobin Tan, Chang Chen, Xinyu Luo, Jiaming Zhang, Constantin Seibold, Kailun Yang, Rainer Stiefelhagen

Skills

Artificial Intelligence

PyTorch, Computer Vision, Generative AI

Programming

Python, C++, C, Java, JavaScript, TypeScript, C#

MLOps, Cloud & Infrastructure

Docker, Git, Linux, ONNX, TensorRT, Model Deployment, Edge AI, Jupyter, VS Code

Engineering & Project Management

Technical Project Management, Agile/Scrum, Cross-Functional Leadership, Engineering Governance, Quality Assurance

Languages

English (Proficient), German (Proficient), Chinese (Native), Cantonese (Native)

Awards

Winner of “Industry 4.0 & AR”-Challenge, Continental #Fiction2Science Hackathon

2018
